FOR IMMEDIATE RELEASE

Exit Device Includes Intruder Function

Visual indicator features unique lock/unlock for enhanced usability

INDIANAPOLIS, March 23, 2022 – Exit devices with intruder function are now easier to use. The BEST Precision Visual Indicator 2110 is a code compliant safe egress with visual and directional indicators for fast and efficient security lockdown.

This panic device incorporates the ANSI “10” function, also referred to as the “Intruder Function,” with new lock/unlock status. A directional indicator is integrated into the housing and contains reflective materials that may be seen in low light conditions. It also features an embossed directional indicator that offers quarter-turn (90°) activation to enable faster lock down.

“The ‘Intruder Function’ enables the ability to lock the exterior exit device lever handle on the outside of the respective door from the interior side without the need for opening the door,” said Michael McCoy, Product Manager. “As demand for the ANSI ‘10’ function for exit devices has grown, so has the desire for lock/unlock verification. By providing this on the BEST Precision Visual Indicator 2110, users can quickly determine if the outside lever is locked or unlocked. They don’t have to open the door to verify, which would place personnel and students at greater risk.”

A directional indicator feature provides the user a clear and concise understanding of what direction to rotate the key or thumb-turn for lock and unlock of the outside lever. The BEST 2110 directional indicator is embossed within the assembly eliminating labels that can peel or fade.

The BEST Precision Visual Indicator 2110 is ideal for high traffic, harsh environments and includes:

- Integrated visual weatherproofed lock/unlock indicator
- Low light color-coded reflective security indicator
- Embossed directional indicator
- Quarter-turn lock down activation

Available in a variety of finishes, including 630 Satin Stainless Steel and 630AM Satin Stainless Steel with UltraShield™ Antimicrobial Coating, the BEST Precision Visual Indicator 2110 can be purchased as a complete exit device or as a retrofit field conversion kit pending the respective application.
