

New LA GARD 700 Series Locks Optimize Performance

INDIANAPOLIS, December 21, 2020 – dormakaba has refreshed its popular line of LA GARD electronic locks and keypads, including firmware functions and software, with best-in-class updates for added security and usability. The new five-model LA GARD 700 Series features a modern keypad design that maintains the physical security of our longstanding locking mechanism with new features that meet and exceed market needs for personal, commercial, financial and government safes.

LA GARD has been the industry leader in electronic combination lock systems offering premium security and reliability. The new LA GARD 700 Series includes:

- A modern, integrated keypad display for ease of operation and efficiency
- Easier programming on a large scale
- Improved battery life and quicker exchange
- Modern, updated software for robust management
- Mobile access with BLE key fob as second credential or time-delay override

“By simultaneously simplifying and improving the overall LA GARD platform, we’ve responded to the most requested product improvements from our customers,” said Dan Baczkowski, Global Product Manager, dormakaba. “This design represents a new era in the LA GARD story and is poised for additional development and expansion.”

The LA GARD 700 Series product line allows users to start with its standard model and scale forward by replacing the control unit. The whole lock does not need to be replaced in order to gain access to the advanced functions in each tier. Additional options include low profile keypad, easy bolt switch and deadbolt configurations and extended warranty. The top tier includes Bluetooth® technology. All tiers feature a low-profile keypad which uses a separate battery box for two 9-volt batteries.

Available in swingbolt, deadbolt, springbolt, and redundant lock designs, it is ideal for gun safes, residential use, retail safes, and light commercial use.

“The new LA GARD keypads incorporate the modern design aesthetics and innovative state-of-the-art security technology dormakaba is known for,” said Baczkowski. “This system easily grows based on a customer’s needs.”
