

## New Wireless Touch-free Actuators Use Infrared Motion Detection Technology

**INDIANAPOLIS, November 6, 2020** – As touch-free access and entry to buildings becomes the standard for businesses to remain open and promote a safe, healthy environment, dormakaba continues to innovate new technologies to minimize touchpoints. The new dormakaba RCI 912 Series wireless, battery powered actuators utilize proven infrared motion detection technology to ensure consistent, dependable touch-free activation. In addition, the RCI 912 Series can be adjusted to comply with ANSI knowing act applications.

Available in three models, the 912 Series detects moving objects such as hands, reflective objects, carts, wheelchairs, or gurneys. It is ideal for use in hospitals, pharmacies, clean rooms, foodservice facilities, and other applications requiring hygienic, touch-free activation.

“The new dormakaba RCI 912 Series is ideal for swing doors; sliding doors; and glass, stone, or marble surfaces,” said Murray Lewin, Senior Product Manager, dormakaba. “It’s a truly versatile touch-free solution using superior technology.”

Specific features and benefits include:

- **Innovative Design** – utilizes infrared motion-detection technology
- **Touch-free Activation** – use with hand or reflective object to trigger clean, hygienic activation
- **Fast and Easy Installation** – simply connect the receiver inside the electronic door operator and fasten (or even adhere) the unit to the wall
- **Field Adjustable** – can be adjusted to comply with ANSI applications with selectable activation and timing outputs
- **Quiet Operation** – silent activation is ideal for use in hospitals and other noise-sensitive environments
- **Strong Signal** – 2.4Ghz transmitter and receiver offer strong signal (30 meters/100ft)
- **Low Power Consumption** – promotes longer battery life; Certified FCC, CE certified
