

FOR IMMEDIATE RELEASE

LE Swing Door Operator Easily Automates Manual Swing Doors

INDIANAPOLIS, July 19, 2021 – Automating medium or heavy-duty swing doors for touch-free access applications is easy with dormakaba’s new ED100LE low energy swing door operator. The ED100LE can automate new or existing manual swing doors with a push plate, wave plate, or other “knowing act” device. A multitude of adjustable features offers flexibility to fine tune the operator to meet opening requirements.

“The ED100LE advanced automatic power assist combines minimal push forces – as low as ANSI size 1 – with reliable closing,” said Tom Chaney, Assistant Vice President, Product Manager, Entrance Systems. “It is a highly adjustable, smartly engineered operator system at home in a variety of outswing and inswing door systems either with a push are or a pull arm.”

The ED100LE is tested beyond traditional standards, using a larger door with greater weight and testing to over one million cycles, with continued testing beyond that benchmark. Tests have shown that at one million cycles, the product uses only 20 percent of its motor life. In addition, tests show that the ED100LE operator has less than a one percent failure rate, globally. It also offers full power durability in a low energy setting.

This product is ideal for interior or exterior use in medium to heavy duty (600 lbs door) settings such as hospitals, care facilities, hotels, restaurants, and at commercial and academic institutions. Specific features include:

- Integrated hardware power supply and relay, allowing for seamless control of security hardware
- Bild-in door position status, indicating door open or door closed
- Close and latch in case of power loss (adjustable closing speed on loss of power)
- Hardware pre-load functionality for reliable operation
- Built-in system interface for connection to any access control system

The ED100LE boasts a small footprint, up to 65 percent smaller than similar operators. It is ADA compliant and meets the stringent requirements of ANSI 117.1 and ANSI A156.19.
