

FOR IMMEDIATE RELEASE

Use Access Technology to Create a Safer, More Secure Workspace

eBook Showcases Access Technology Options

INDIANAPOLIS, March 23, 2022 – Access solutions technology is allowing occupants to enjoy smarter, safer, more hygienic, and more versatile workspaces. The free ebook, *7 Steps to Creating a Safe & Secure Building*, by dormakaba, a leader in access and security solutions, shows office leaders, business owners, and property managers access technology options that can help guide employees, tenants and guests safely throughout their buildings.

“Building confidence for employees and tenants to confidently navigate buildings means giving them visual signs that you’re taking their well-being seriously,” said Eddie Sims, dormakaba Senior Sales Manager, Entrance Systems Key Accounts. “Those visual signs could include touch-free access to the building or restrooms, re-configured space for hybrid or co-working space and optical turnstiles for people counting. Optimal configuration of office space – whether in a traditional model, a hybrid one, or a co-working one – must be flexible enough to allow the most efficient use of space, even if decreased use is needed.”

Access solutions technology, the foundation for security and convenience, offers flexible solutions to enhance hygiene and public safety without sacrificing security, convenience, or efficiency. The innovative integration of touch-free and mobile access control solutions has emerged as a key driver to address immediate needs and set the stage for future updates.

In addition, demountable interior glass wall systems allow owners and property managers the ability to move or reconfigure office or conference room space to meet the needs of the occupants. Glass is a hygienic solution as it is easy to clean and won’t discolor or scratch like plexiglass.

7 Steps to Creating a Safe & Secure Building details the considerations and solutions office leaders and property managers need for successful occupancy in the following areas:

- 7 Critical Points to Enhance Hygiene
- Mobile and Touch-Free Product No Longer Optional
- The New Smart Building Access Control Audit

The eBook also details the story behind dormakaba customer Greenway Plaza (Houston) and their successful conversion of five million square feet of office space to touch-free access in seven weeks.
