

Mobile Technology Offers Secure Control

INDIANAPOLIS, IN, July 19, 2021– Mobile Access via smartphones, tablets and smartwatches, is fast emerging as the preferred normal in a world that requires security reliability and limited physical contact, and values personalization.

dormakaba's [Mobile Access Solutions](#) offers state-of-the-art technology to securely issue, revoke and update digital credentials on mobile devices. Using best-in-class Legic Connect cloud technology, these credentials can be used across the company's line of RFID and Bluetooth Low Energy (BLE) access control products to access hotel rooms, residential units, university accommodations and other protected facilities such as laboratories, server rooms, remote utilities and commercial buildings. It is a convenient, future-proof solution that offers contactless, barrier-free and user-friendly access. In addition, dormakaba's Mobile Access Solutions assure secure entry, minimize high frequency touchpoints, and help reduce the spread of germs.

"Our end-to-end integrated Mobile Access options are field-tested BLE solutions in demanding environments," said Darren Blankenship, AVP Vertical Marketing Development at dormakaba. "All BLE services are owned in-house for added data security and ease of use. Among our hospitality clients alone, we've deployed over five million keys since 2015. With that record of experience, we can help any customer in any category get ready for Mobile Access as the new standard in the near future."

Key features include:

- Hosted by [Legic Connect](#)
- Compatible with BLE (Bluetooth Low Energy) mobile devices
- Provides real-time access on demand using over-the-air provisioning
- No software to install, maintain or manage for dormakaba customers
- State-of-the-art bidirectional encryption and key storage
