dormakaba's Axessor Apexx IP platform Sets New Standard for Seamless Access Control in the Safe, Vault, and ATM Segments

INDIANAPOLIS, April 10, 2024 – Axessor Apexx transforms the way access control and audit reporting is managed for cash and security assets across global financial institution, ATM and retail segments. This multi-lock IP-connected solution provides advanced security encryption and remote management capabilities, reducing the need for additional administrative costs.

With the ability to add or delete users remotely, receive near real-time audits, and apply security settings, Axessor Apexx sets the new standard for safe locks. Additionally, this innovative solution reduces an enterprise-wide risk profile through automated push notifications and customized end-of-day reporting.

"The Apexx platform is a harmonization effort that delivers bleeding edge technology with unprecedent flexibility for remote user management," Bruce Kayal, SVP & GM, Global Safe Locks, dormakaba. "Apexx brings a 21st century look, feel and simplification to how our clients have asked to remotely manage access to secured containers across their enterprise."

As the global leader in safe locks, dormakaba continues to deliver both market-leading efficiency and security with the Axessor Apexx.
