RVM Software Solution Gaining Traction with Multifamily Properties

Community Resident Visitor Management puts access control in hands of the resident

INDIANAPOLIS, June 19, 2024 – With today's increased frequency of home delivery services, visitor management solutions give residents greater access control flexibility without compromising security. dormakaba's Community™ software Resident Visitor Management (RVM) feature is gaining traction among multifamily properties as they seek to offer a competitive advantage to attract and retain residents.

"Today's multifamily residents have high expectations and properties will thrive or fail based on their ability to meet those demands," said Derek Coats, National Systems / Integration Specialist for Multifamily Housing at dormakaba. "Our Resident Visitor Management feature meets the security and operational requirements property managers need while providing an easier way for residents to manage the increased frequency of deliveries and visits from service providers, family, or friends."

dormakaba's RVM offers a full range of features to meet the evolving multifamily access requirements:

- Generate and manage PIN code and mobile key access credentials through dormakaba's enhanced BlueSky app
- Advanced PIN code management including easy Xpress PIN code for single use visitors
- Centralized auditing of all common and amenity access points
- Resident access to visitor history
- Supports long range reader technology designed for easy access to parking garages, service areas, and entrances
