

dormakaba EntriWorX Door Insights offers easy, real-time access to actionable data for smart building operations

INDIANAPOLIS, April 10, 2024 – EntriWorX Door Insights is a new, user-friendly web application recently added to dormakaba's EntriWorX EcoSystem solutions. EntriWorX Door Insights securely manages operational data across a network of new or existing dormakaba automatic doors from a single, centralized dashboard.

EntriWorX Insights transforms automatic door data into meaningful, actionable insights that enables users to:

- **React instantly to solve door issues:** approximately 50 percent of alerts can be corrected quickly by the onsite team.
- **Get real-time insights anywhere:** cloud-based data management allows remote monitoring of multiple installed systems.
- **Monitor secure access:** know entrances are locked and secure when they should be and open and accessible when they need to be.
- **Do preventative maintenance:** IoT and "Always On" allow maintenance and repair to be tailored to current needs as opposed to strict maintenance schedules.

Its secure user management capability gives full control of who can access door insights and provides visibility over the entire installed automatic door base regardless of how large or geographically spread.

"There are no limits on how many users or devices can access EntriWorX Door Insights," said Matt Guise, AVP EntriWorX at dormakaba. "Everyone in your organization who needs to monitor operational data for your automatic doors can use it on any device, from anywhere and at any time. Every user can also subscribe to real-time alert notifications to enable quick action when needed."

The dashboard has a simple tab-based navigation and includes interactive door maps, built-in search, and advanced filters making data retrieval quick and easy to understand without any specialized knowledge.

More about the EntriWorX EcoSystem

dormakaba's EntriWorX EcoSystem is an innovative digital environment to address access challenges at every phase of the building life cycle, from planning to operations. It includes planning software that simplifies the planning process for all the professionals and trades involved in the door schedule development process in addition to supporting operations once installed. Solutions include EntriWorX Planning 360°, EntriWorX Planner, and now EntriWorX Insights.
