

dormakaba EntriWorX Planning 360° Platform Ideal for Door Schedule Management

INDIANAPOLIS, March 27, 2023 – The new EntriWorX Planning 360° planning platform fully supports door schedule management. This new service enables easier planning, management, and merging of different trades “around the door” by both architects and planners.

This versatile platform serves as the CDE (Common Data Environment) for door planning. It optimizes the BIM process and works with BIM models in different formats. In addition, the EntriWorX Planning 360° provides efficient and direct communication and collaboration between all project participants via standard interfaces such as BCF (Building Collaboration Format). It also includes direct access to standard door templates and the dormakaba product spectrum.

“Planning multifunctional access systems today demands effective management of different data from a range of sources,” said Matt Therrien, assistant vice president architectural services at dormakaba. “EntriWorX Planning 360° provides all the data needed for door planning and installation such as wiring diagrams, component lists, installation handbooks, and overview drawings. It serves as an interface for collaboration and data flow across all trades and partners to make the (BIM) planning process more efficient.”

Performance features include, but are not limited to:

- upload of BIM models and Excel files
- project wizard with templates for Revit and Excel files
- Clear 3D illustrations
- Import and export of door schedules
- Change tracking
- Direct access to product information and data sheets from the project
