

FOR IMMEDIATE RELEASE

dormakaba GP Series Glass Panic Hardware Simplifies Installation Time

INDIANAPOLIS, October 18, 2022 – dormakaba’s GP Series Glass Panic Hardware is the access industry’s first in-field adjustable glass panic. Accommodating a wide range of door sizes and applications, the GP Series offers a customizable design with simplicity in specification. It is a low risk, high-end option to create an efficient exit.

The GP Series adapts to meet ½-inch adjustments within a 1-inch window, making customer fabrication simpler. Watch a short [timelapse](#) of a recent install to see this innovation in use.

“The GP Series’ innovative design allows for adjustability when needed to accommodate field conditions said Curtis Massey, product manager for interior glass systems. “In addition, the GP Series leverages a single hole glass fabrication at the panic actuator post, which reduces glass fabrication costs and simplifies installation. The device adjusts to the finished door height rather than adjusting the finished door height to the panic device. This helps accommodate for glass fabrication tolerances, which in turn leads to reduced installation labor costs and replacement due to miss-sizing.”

Specific features include:

- Elegant and durable
- 316 stainless steel
- Adjustable within a 1” variance which assures overall aesthetics
- Simplifies on-site installation
- Reduces labor costs

Glass panic devices primarily provide a means of egress in an emergency, as required by life safety code mandates of the International Building Code (IBC). However, panic devices frequently play double-duty as access control, either with manual strikes or electrified options including latch retraction (each with their own code requirements and restrictions).

GP Series panic devices feature a slim profile to support the transparency and aesthetic requirements for glass openings without impacting durability. They may be used with deadbolts for manual access control or without a locking function to mirror on nearby openings.
