

UNIQUIN Demountable Interior Glass Partition Enhances Interior Architecture *dormakaba's Versatile Access & Room System Offers Reduced Sound Transmission*

INDIANAPOLIS, September 13, 2021 – Beauty and functionality are no longer mutually exclusive thanks to the UNIQUIN demountable glass wall system from dormakaba. UNIQUIN is a new interior, multifunctional wall system for commercial office room configuration.

With the future of office design changed from the pandemic, UNIQUIN offers the possibility to individually design and separate interior space with glass – for higher transparency and advanced well-being. The coordinated design of all components is flexible, functional and allows for subsequent modifications, if required. In addition, the high Sound Transmission Class (STC) rating creates industry leading acoustic performance and helps absorb sound waves for reduced sound transmission room to room.

“Created to enable attractive and dynamic spaces, UNIQUIN has a professional, architectural aesthetic, durable construction, and broad application versatility,” said Curtis Massey, product manager, interior glass systems. “UNIQUIN blends transparency and discretion to enhance interior design functionality and performance.”

UNIQUIN features flush-fitting profiles complemented by hardware and locking systems in the same coordinated design. It can be fitted with fixed elements made of glass, or other materials in thicknesses between 3 / 8 inch and 3 / 4 inch. UNIQUIN is ideal for virtually any location requiring separate spaces.

- Offices spaces
- Relaxation areas in offices/break areas
- Conference rooms
- Hotel rooms where smaller, segmented space is needed
- Large rooms where acoustic separation is needed such as fitness rooms

Designers, installers and everyday users can take advantage of UNIQUIN's unique design and performance capabilities.

- Matched design with individually combinable components: profiles, fittings, locking systems and more
- Integration of access control systems
- Reduced sound transmission between adjacent rooms by up to 41dB
- Customizable fabric cover that can be printed to offer a visual highlight and enhance the ambient feel of the space
- Both normal and high-rise door options are available
- Separating elements and door solutions can be used with glass, wood or other materials
- Quick and easy installation
- May contribute to LEED
